

BUREAU VERITAS

Oil & Petrochemicals

Automotive Industry

Global Oil & Gas Testing Services
for the Automotive Industry

**BUREAU
VERITAS**

Automotive Industry

Bureau Veritas is able to assist the automotive industry to ensure the quality and purity of fuels and lubricants powering their vehicles. Accurate analysis and fuel integrity monitoring programmes help to avoid problems with engine failure, schedule disruptions, downtime, and costly repairs. Expert fuel tank sampling combined with fast turnaround of fuel analysis results allow companies to take rapid action to solve a problem, helping to a reliable and dependable service to their end users.

Our analysis can provide a range of support, including: determining warranty coverage for customer vehicles; identifying emerging quality issues; determining illegal fuel use; and bacterial testing on gasoline & diesel and detection of wear and contamination.

Key Features

150 years of technical excellence in the Oil & Petrochemicals market

Global Lube Oil Analysis Management System (LOAMSSM) Platform for Oil Condition Monitoring

Extensive national and global network of offices and laboratories

Precise, dependable and prompt reporting

Personalized Account Management

Independent and impartial testing results

Customer Benefits

Your product expert for fuels, lubricants, coolants and oil condition monitoring

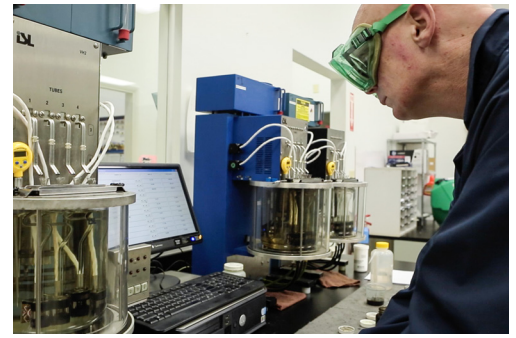

Exclusive software that brings clarity and meaning to complex laboratory results and maintenance recommendations that improve production and save money

Ability to test your fuels anywhere, any time

Accurate results, the first time, every time

Account manager will be your primary contact, regional teams available for direct communication 24/7

Quality assurance executed to the highest standards, trusted by all parties

Testing & Analysis

Bureau Veritas' state-of-the-art facilities are home to the latest in analytical techniques and allow us to provide quality assurance to some of the world's leading brands and organizations.

Our services will help the automotive industry with determining the root cause of engine and mechanical problems at an early stage by the implementation of a rigid sampling programme for fuels, lubricants, coolants and greases.

We can support preventive maintenance and litigation needs for our clients with impartial analytical data.

In addition to our comprehensive packages for Diesel Testing, Gasoline Testing and Oil Condition Monitoring, Bureau Veritas also offers sample kits and logistics to customers to ensure rapid turnaround of results.

Key Capabilities
